

Agentic Lending

At CubeMatch, we can create a unified interface for an Intelligent Loan Underwriting Platform.

6 Specialized AI Agents collaborate in real-time to verify, analyze and underwrite SME loans in minutes, not days.

Core Functions

Unifies the entire loan origination process into a single, intuitive interface.

Coordinates a swarm of specialized AI agents in real-time.

Drastically reduces processing time from multi-day cycles to under 3 minutes per application.

Extracts 97+ highly accurate data points upfront to feed the automated pipeline seamlessly.

How It Works

6 specialized AI Agents working in an intelligent pipeline, each responsible for a critical dimension of the loan assessment.

Document Scanner Agent

Credit Analyst Agent

Fraud Sentinel Agent

KYC/AML Verifier

Credit Reputation Agent

Decision Orchestrator

A powerful combination of tools allowing the AI agents to think, learn and handle large amounts of data quickly and reliably.

Governed by an Agentic AI Framework that makes all the technology and systems work together in a coordinated fashion.

Transforming Lending Operations with Agentic AI for End-To-End Automation

Fraud Reduction

Faster Approvals

More Accurate Assessments

Accurate KYC for Compliance

Our AI Agents can be tailored to your business requirements and deployed anywhere in a bank, not just a lending process.

Impact

A highly scalable and “touchless” integrated system of AI Agents and features working together for streamlined, production-ready SME lending.

AI-POWERED PROCESSING & ANALYSIS

- Real-time agent collaboration via WebSocket.
- Risk-based pricing engine.
- SLA monitoring with breach detection.
- PDF risk support generation.

DYNAMIC OUTPUTS & MONITORING

- The command center manages the entire loan cycle.
- Leveraging 55+ AI tools, risk-based pricing and real-time features to analyse and score loans dynamically.
- Providing SLA monitoring, collaboration tools, risk reports for auditable, transparent decision-making.

COMPLIANCE FOUNDATION

- This entire AI-powered system operates within a robust, regulatory compliant framework, ensuring adherence at every single step.
